

## Atlantic Research Group Opens Office in Munich

### Location in Bavaria, Germany Next Step in Controlled Growth Plan

CHARLOTTESVILLE, Va. and MUNICH, June 8, 2022 -- [Atlantic Research Group](http://atlanticresearchgroup.com) (ARG), a full-service global contract research organization (CRO), has opened an office in Munich.

The new location in Germany bolsters ARG's European operations, adding to existing offices in London, Amsterdam, Steinhausen and Warsaw.

ARG, founded in 2004, an industry leader in clinical trial management in [oncology](#), [immunology](#) and [neurology](#), also has an office in Sydney and its global headquarters in Charlottesville, Virginia.

"We remain steadfastly committed to Europe," stated Dr. Ignazio Di Giovanna, Vice President, Europe. "Bavaria is a natural fit for ARG, with world-class transportation and business infrastructure. This office is part of our controlled growth plan here in the EU and around the world."

The Germany location significantly enhances ARG's capability to better serve small to mid-sized pharmaceutical companies.

ARG's location in Munich strengthens the organization's reach in an area of Europe known as a health care and life sciences hub. "We are excited by the addition in Germany. This gives us a competitive edge in an established market and provides a major benefit to our customers," said Dr. Di Giovanna.

"Munich, with over five million people, is also an attractive place to live and work--and therefore a place where ARG can add talent to our team. For our organization, it's the right place at the right time," added Dr. Di Giovanna.

#### **About ARG:**

ARG is a contract research organization focused on oncology, immunology and neurology, providing comprehensive clinical program development services ranging from pre-launch consulting to commercialization, achieving over 50 market authorizations to date. Founded in 2004 with the vision that every project should be highly individualized, ARG has experienced consistent growth across the globe, expanding our range to include drug and device strategic consulting, clinical trial management services, as well as clinical data and analytic solutions. ARG uses first-in-class technology platforms along with relationship-driven flexibility to optimize clinical studies because we believe everyone deserves to be well.
